

# **Undergraduate Admissions Policy**

TIU, in alignment with its founding spirit, educational philosophy, and educational objectives, seeks students with the following qualities to join our university:

- 1) Have the motivation and ability to proactively pursue studies and campus activities at TIU.
- 2) Have acquired fundamental knowledge and an essential attitude toward learning through their studies and activities in secondary school.  
※ The "fundamental knowledge" and "essential attitude" in (2) will be the basis from which students will adopt TIU's five basic principles: (a) knowledge and understanding; (b) critical thinking; (c) interest and motivation; (d) attitude and discipline; and (e) skills and expression.

TIU appropriately implements various entrance examination types to welcome students with the qualities sought by each department / faculty.

## **Business Economics (BE) and Digital Business and Innovation (DBI) Majors**

The School of Economics expects all students to uphold the university's founding spirit and educational philosophy, agree with the terms of the education policy, and aim to uphold the following qualities:

1. A positive approach towards academia and activities on campus.
2. Utilizing what was learned during one's high school years in order to form the basics necessary for studying at university.
3. A positive attitude towards utilizing basic, but broad, knowledge, as well as logical, analytical, and strategic thinking when going about one's activities in the globalized world.
4. An eagerness to develop ethical, logical and strategic thought processes and learn how to apply them to business settings.

## **International Relations (IR) Major**

The School of International Relations expects all students to uphold the university's founding spirit and educational philosophy, agree with the terms of the education policy, and aim to uphold the following qualities:

1. A positive attitude towards, and active involvement in academia and activities on campus.
2. Utilizing what was learned during one's high school years in order to form the basics necessary for studying at university.
3. Making a continuous effort to understand the diverseness of international society, and to have a pragmatic attitude towards problem solving.

# **Graduate School Admissions Policy**

## **Graduate School of Business and Commerce**

The Graduate School of Digital Business and Innovation (DBI) admits applicants to both Master of Science (MS) and Ph.D. In general, the MS applicants are expected to have bachelor's degree with the knowledge and ability necessary to further advance his/her analytical, creative, and problem-solving capability as well as to conduct specialized research in the fields related to broad areas of digital innovations as stated in the introduction. While wide areas of bachelor degree applicants may qualify to apply, it is emphasized that students with exposure to some quantitative areas such as mathematics, science, economics, accounting, IT, engineering may be preferred. MS students are expected to submit their research or project proposal.

For Ph.D applicants, it is also preferred to have bachelor's degrees in the areas stated in the above paragraph, but with much stronger emphasis on conducting specialized research related to the field of DBI. However, an applicant with a Master's degree is considered based on his or her Master degree credentials and research proposal.

## **Graduate School of Economics**

A person who has already earned an undergraduate degree as well as acquired the necessary knowledge and ability to develop expertise in the field of economic research. Furthermore, a person who demonstrates a continuous effort in tackling various policy issues and changes in economics. Finally, a person who aims to become a researcher, or sophisticated career person, possessing the creativity to cultivate his/her own frontier.

## **Graduate School of International Relations**

A person who has already earned an undergraduate degree and therefore acquired the knowledge and ability necessary for conducting conceptual, analytical research connected to the notion of "globalization in international societies." Furthermore, a person who demonstrates a continuous effort to become a researcher, or sophisticated career person, forming a platform with his/her own stance in order to create new paradigms in the field of international relations.

# **Ph.D. Admissions Policy**

## **Graduate School of Business and Commerce**

The Graduate School of Digital Business and Innovation (DBI) admits applicants to both Master of Science (MS) and Ph.D. In general, the MS applicants are expected to have bachelor's degree with the knowledge and ability necessary to further advance his/her analytical, creative, and problem-solving capability as well as to conduct specialized research in the fields related to broad areas of digital innovations as stated in the introduction. While wide areas of bachelor degree applicants may qualify to apply, it is emphasized that students with exposure to some quantitative areas such as mathematics, science, economics, accounting, IT, engineering may be preferred. MS students are expected to submit their research or project proposal.

For Ph.D. applicants, it is also preferred to have bachelor's degrees in the areas stated in the above paragraph, but with much stronger emphasis on conducting specialized research related to the field of DBI. However, an applicant with a Master's degree is considered based on his or her Master degree credentials and research proposal.

## **Graduate School of Economics**
